VISUELE BEOORDELING KREUPELHEID

The image contains three parts: 1) A close-up of a horse's eye. 2) A diagram titled 'Lame Trotting' showing four horses in a trotting sequence. The first horse has its head raised, and the second has its head lowered. A 'Lame foot' is indicated on the second horse. 3) A line graph titled 'Vertical displacement (m)' vs 'Percentage Stride'. The y-axis ranges from -0.1 to 0.05. The x-axis ranges from 0 to 100. Three shaded regions are labeled RF (Right Forelimb, 0-40%), LF (Left Forelimb, 40-80%), and RE (Right Hindlimb, 80-100%). The graph shows two curves: a black curve and an orange curve, both exhibiting a sinusoidal-like wave pattern.

PROBLEMEN VISUELE BEOORDELING

- ‘Perceptie’ van kreupelheid (Parkes et al, 2009)

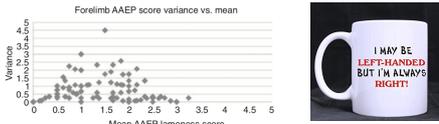

How many legs does this elephant have?

- ‘Concept’ van kreupelheid

Ghent University logo and number 4.

- Variabiliteit tussen waarnemers (Keegan et al, 1998, 2010)
- Ervaring?

- Keuze gradatiesysteem (Hewetson et al, 2006)
- ‘Bias’ na lokale anesthesie (Arkell et al, 2006)

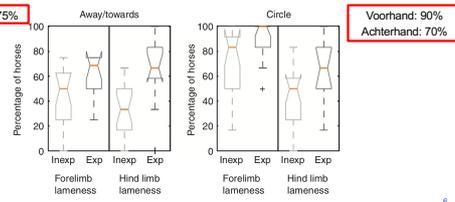

Ghent University logo and number 4.

Veterinary student competence in equine lameness recognition and assessment: a mixed methods study
 Sandra D Starke and Stephen A May
 Veterinary Record 2017 181: 168

20 studenten
 34 filmpjes
 Kreupelheid +/- 3/10

70-75%

Voorhand: 90%
 Achterhand: 70%

Ghent University logo and number 6.

– Leereffect

– Foute beoordeling

- Links-rechts: conceptueel
- Voor-achter: perceptie (interactie/compensatie)
- Correct identificeren 'normaal paard'
- spectrum van 'correcte' beweging

Ghent University logo

METHODEN

– Voorhand

- 'Lagere hoofdpositie op gezonde lidmaat' ('impact')
- Uitzondering: extreme 'push-off' kreupelheid

Vertical displacement (m)

Percentage Stride

NORMAL HORSE
RF IMPACT LAMENESS
RF PUSHOFF LAMENESS

MAXDIFF = A - B = 0
MINDIFF = C - D = 0

MAXDIFF = A - B = +
MINDIFF = C - D = +

MAXDIFF = A - B = -
MINDIFF = C - D = -

Ghent University logo

– Achterhand

- Totale bewegingsamplitude tuber coxae (li vs re)
 - ↑ aan zijde kreupelheid
 - Conformatie!
- Verticale verplaatsing sacrum
 - Min en Max positie
 - Kleinere amplitude dan TC

Ghent University logo

10

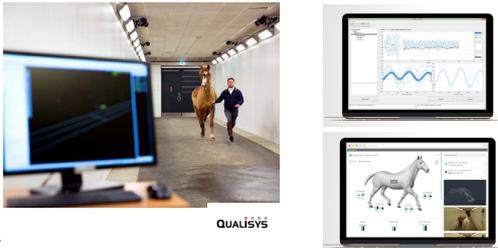

OBJECTIEVE EVALUATIEMETHODES

– Krachtplaat en drukplaat (e.g. RSScan International)

13

– Camera-gebaseerde systemen (e.g. Qualisys QHorse)

14

– Inertial sensors

'OWNER-SOUND'

- >70% van 'normale' sportpaarden: significante asymmetrie in beweging / kreupelheid

16

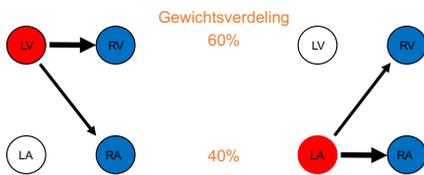

"MULTI-LIMB LAMENESS"

- 'Compensatoire kreupelheid'
- Multipelen problemen
 - Primair
 - Secundair

17

REDISTRIBUTIE KRACHTEN

18

'LAW OF SIDES'

– Ipsilateraal : start achteraan **TRUE**

– Contralateraal: start vooraan **1/2 TRUE**

Ghent University

19

CASUS

– Quarter merrie, 13 j.

Ghent University

20

24

TAKE HOME MESSAGE

- Compensatoire kreupelheid voorhand ten gevolge van kreupelheid achterhand (ipsilateraal) **WATCH OUT!**
- (Compensatoire kreupelheid achterhand ten gevolge van kreupelheid voorhand)
 - Ipsilateraal impact (soms)
 - Contralateraal push-off (vaker)
- Meten is weten

The screenshot shows a webpage from 'The Veterinary Journal' with the title 'Recognition of lameness: Man versus machine' by Sue Dyson. It includes a 'Full Text' link and a 'Download PDF' link.
