<i>Foreword</i>	xix
<i>Contributing Authors</i>	xxv

Chapter 1.

Basic Concepts of AI for Legal Scholars

Rembrandt DEVILLÉ, Nico SERGEYSSELS and Catherine MIDDAG.....	1
1. Introduction	1
2. Defining and Measuring AI.....	2
2.1. Definition: What is AI?.....	2
2.2. The Turing Test and the Loebner Prize	3
3. Basic Principles of AI	4
3.1. Knowledge-Based versus Data-Based Learning	4
3.2. Internet of Things and Big Data	5
3.3. Machine Learning	6
3.4. Artificial Neural Networks and Deep Learning.....	7
3.5. Data Bias and Model Bias.....	10
4. AI Sub-Disciplines.....	11
4.1. Search Algorithms.....	12
4.2. Computer Vision	12
4.3. Natural Language	12
4.4. Speech	13
4.5. Agents	14
5. The Current and Future Use of AI Applications.....	14
5.1. An Overview of some AI Applications in the Present and near Future.....	14
5.1.1. Transportation.....	15
5.1.2. Robots	16
5.1.3. Healthcare.....	17
5.1.4. Education	18
5.1.5. Public Safety and Security	18
5.1.6. Arts and Entertainment	19
5.1.7. Law.....	20
5.2. AI in the More Distant Future.....	20
6. Conclusion	21

Chapter 2.

Different Models of Innovation and Their Relation to Law

Charles DELMOTTE	23
1. Introduction	23
2. Standard Economic Model on Innovation.	26
2.1. The Neoclassical Model.	26
2.2. Tax Incentives for Innovation	28
2.3. Dubious Empirical Track Record of Tax Incentives.	31
3. Institutional Economics	32
3.1. The Market as a Dynamic Process	33
3.2. Innovation: An Endogenous and Unpredictable Phenomenon	37
3.3. Tax Incentives for Innovation: a Critique	40
3.3.1. Identifying Innovators	40
3.3.2. The Amount of the Tax Benefit	41
3.4. Innovation policy: the propertarian approach	42
4. Conclusion	48

Chapter 3.

Setting the Scene: On AI Ethics and Regulation

Michiel FIERENS, Stephanie ROSSELLO and Ellen WAUTERS.	49
1. Introduction	49
2. Ethics of AI	50
3. Regulation of AI	55
4. Current Trends in AI Governance	62
5. Conclusion	71

Chapter 4.

Quantitative Legal Prediction: the Future of Dispute Resolution?

Matthias VAN DER HAEGEN.	73
1. Introduction	73
2. Legal Analytics.	74
3. Existing Applications	77
3.1. COMPAS.	78
3.2. HART.	78
3.3. Case Law Analytics	78
3.4. Prometea	79
4. Potential Use Cases and Their Advantages	80
4.1. Potential Use Cases	80
4.2. Advantages of QLP	82
5. Challenges.	82
5.1. Limits of Predictive Models Within the Legal Domain	83

5.1.1.	The Application of Law Does not Adhere to Predetermined Rules.	83
5.1.2.	Changeable Nature of Law.	84
5.1.3.	Risk of a Normative Prediction.	85
5.2.	Challenges Inherent to Predictive Models.	86
5.2.1.	Bias Within Predictive Models	86
A.	Biased Training Data.	87
B.	Biased data	87
C.	Biased Algorithms	89
5.2.2.	Transparency	90
5.2.3.	Trust.	93
6.	The Case for Belgium	94
6.1.	Publication of Case Law by the Judiciary.	96
6.2.	Publication of Case Law by Publishers.	97
6.3.	General Publication of Case Law in the Near Future?	97
7.	Conclusion	98

Chapter 5.

AI Arbitrators ... 'Does Not Compute'

	Kevin ONGENAE.	101
1.	Introduction	101
2.	There are Considerable Data-Related Hurdles to AI-Based Arbitrators ...	104
2.1.	The Amount of Data Needed for Performant AI is not Available in Arbitration	104
2.2.	Arbitration Data is not Suitable for AI Development	106
2.3.	An AI Arbitrator Most Likely Could not Cope with Novel or Unique Issues	108
2.4.	AI Arbitrator Would Copy Mistakes in Previous Data.	109
2.5.	Conclusion Concerning Data-Based Flaws	111
3.	The Current Legal Framework is Inhospitable to AI Arbitrators.	111
3.1.	Arbitration Law is Built around the Assumption of a Human Arbitrator	113
3.2.	Independence and Impartiality of an AI Arbitrator?	115
3.3.	Formal Requirements for Rendering an Arbitral Award Currently Exclude an AI Arbitrator	116
3.4.	Duty to Provide Reasons.	118
3.5.	Conclusion Concerning the Legal Framework	119
4.	Conclusion and Look Ahead	120

Chapter 6.

AI through a Human Rights Lens. The Role of Human Rights in Fulfilling AI's Potential

Charline DAELMAN	123
1. Introduction	123
2. The Impact of AI on Human Rights: Risks and Opportunities	124
2.1. Right to Life, Liberty, Security and a Fair Trial	125
2.2. Right to Privacy	126
2.3. Right to Freedom of Thought, Conscience and Religion, Expression and Assembly/Association	127
2.4. Prohibition of Discrimination	129
2.5. Right to Political Participation and Prohibition on Propaganda ...	130
2.6. Right to Work and to an Adequate Standard of Living	131
2.7. Right to Health	133
2.8. Right to Education	135
2.9. The Protection of Intellectual Property	136
3. The Recurring Issue: Discrimination and Bias	137
3.1. Discrimination Caused by AI Systems	137
3.1.1. Discrimination at the Process Level	138
3.1.2. Discrimination at the Classification Level	140
3.2. Discrimination Grounds	141
3.2.1. Discrimination Based on Ethnicity: Uyghur Muslim in China	141
3.2.2. Discrimination Based on Gender: Online Job Advertisements	142
3.2.3. Discrimination Based on Religion, Belief and Political Opinion: Facebook	143
3.2.4. Discrimination Based on Race: Gerrymandering	143
3.3. Silver Linings	144
4. Bending Threats into Opportunities: Human Rights as the Ethical Framework to Ensure AI's Potential	145
5. Conclusion	148

Chapter 7.

Killer Robots: Lethal Autonomous Weapons and International Law

Sebastiaan VAN SEVEREN and Carl VANDER MAELEN	151
1. Introduction	151
2. International Humanitarian Law	152
3. Applying the Current Legal Framework to LAWs	156
4. Current Applications and Foreseeable Developments	164
5. Necessity of Legal Framework	169
6. Conclusion	172

Chapter 8.**AI and Data Protection: the Case of Smart Home Assistants**

Carl VANDER MAELEN, Eva LIEVENS, Judith VERMEULEN and

Ingrida MILKAITE 173

1. Introduction 173
2. SHAS and the General Data Protection Regulation. 179
 - 2.1. SHAS and the Lawful Processing of Data: 'It's Complicated' 184
 - 2.2. Children and SHAS: Present but 'Invisible' Data Subjects 188
 - 2.3. Special Categories of Personal Data: Domestic Setting Reveals
Very Private Information 191
 - 2.4. Transparency: Innovative and Effective Information Formats
Needed 193
 - 2.5. Data Subject Rights: Rectification, Erasure, Restriction,
Portability and Objection 194
 - 2.6. Automated Decision-making: Cause for Concern 196
 - 2.7. Main Data Controller and Processor Obligations: the
Importance of Data Protection Impact Assessments and
Codes of Conduct 199
 - 2.8. Enforcement: Slowly but Surely DPAS Take Action 202
3. Conclusion: Towards Data Protection Compliant SHAS 204

Chapter 9.**AI and IP: a Tale of Two Acronyms**

Jozefien VANHERPE 207

1. Introduction 207
2. IP Protection for AI Technology 214
 - 2.1. Overview 214
 - 2.2. Protection Under Patent Law 214
 - 2.3. Protection Under Copyright Law 217
3. IP Protection For AI-Generated Output 218
 - 3.1. AI Authorship of AI-Generated Works 219
 - 3.2. AI Inventorship of AI-Generated Inventions 227
 - 3.3. Ownership of AI-Generated Output 232
4. Conclusions 239

Chapter 10.**Tax and Robots**

Dina SCORNOS 241

1. Introduction 241
2. Relevant Belgian Tax Rules for Corporations Using Smart Robots
and/or AI 243

2.1.	The Investment Deduction	244
2.2.	The Innovation Income Deduction	246
2.3.	The Exemption of the Regional Real Estate Tax on Equipment, Machines and Other Installations.	249
3.	To Tax or Not to Tax Robots?	250
3.1.	Discussions to Introduce a Robot Tax in Belgium	250
3.2.	Tax Policy Considerations	251
3.2.1.	Is There a Need for a Robot Tax?	251
3.2.2.	Hypothesis: It Is Established That There Is a Need for a Robot Tax	254
3.3.	Challenges in the Design and Implementation of a Robot Tax . . .	255
3.3.1.	How to Define Robots for Tax Purposes	255
3.3.2.	A Tax on the Use of Robots?	257
3.3.3.	A Tax on Robots Themselves?	258
3.4.	Alternatives to a Robot Tax	260
3.5.	Conclusion	262
4.	Smart Robots and International Tax Rules	262
4.1.	Overview of Current International Tax Rules and Their (Non?) Applicability to Smart Robots/AI	263
4.1.1.	Fixed Place of Business PE	265
A.	Existence of a PE	265
B.	Profit Allocation to the PE	267
4.1.2.	Agency PE	268
4.2.	Necessity to Adapt the International Tax Rules from a Policy Perspective	269
4.3.	The Pillar One Blueprint	271
4.3.1.	Activities and Businesses Targeted by the Proposal	271
A.	Automated Digital Services	271
B.	Consumer-facing Businesses (CFB)	273
4.3.2.	Quantitative Thresholds	274
4.3.3.	Determination of Taxing Rights of the Market Jurisdiction	274
4.3.4.	Profit Allocation to the Non-Resident Country	276
4.3.5.	The Issue of Double Counting	277
4.3.6.	Conclusion	278
4.4.	Implications of Allocating Legal Personality to Robots on the Applicability of International Tax Rules	278
5.	Opportunities Created by AI and Robots	280
5.1.	Opportunities for Tax Authorities	280
5.2.	Opportunities for Tax Practitioners	281
5.3.	Opportunities for Corporations	282
6.	Conclusion	282

Chapter 11.**Robotisation and Labour Law. The Dark Factory: the Dark Side of Work?**

Simon TAES.....	285
1. Introduction	285
2. The Appearance of Robotisation	287
2.1. Towards a Fourth Industrial Revolution	287
2.2. Robotisation: The Next Stage in the Division of Labour	287
3. Social Implications of Robotisation	291
3.1. The 'Robotised' Labour Market.....	291
3.1.1. Three Hypotheses from Labour-Economic Perspective ...	291
3.1.2. Consequences for Labour Market Policy.....	294
3.1.3. Recommendations for Belgian Labour Market Policy ...	295
A. Matching Skills on the 'Robotised' Labour Market ...	295
B. Closing the Social Inequality Gap.....	299
4. Labour Law in the 'Robotised' Work Environment.....	300
4.1. The Evolving Human-Robot Relationship.....	301
4.1.1. Guaranteeing Physical Safety and Mental Health	301
4.1.2. Workers' Responsibility for Robot Colleagues.....	305
4.1.3. Recommendations for the Evolving Human-Robot Relationship	306
4.2. Impact of Robots on the Employment Relationship	306
4.2.1. Robotic Decision-Making and Privacy	307
4.2.2. Robotic Decision-Making and Discrimination	310
4.2.3. Sharing Responsibility in the 'Robotised' Employment Relationship	311
5. Humanisation in Context of Robotisation	314

Chapter 12.**The Hypothesis of Technological Unemployment Caused by AI-Driven Automation and its Impact on Social Security Law**

Jakob Markus WERBROUCK	317
1. Introduction	317
2. The Technological Unemployment Hypothesis	318
3. The Potential Impact of Technological Unemployment on Social Security	322
3.1. Employment as an Essential Variable in Social Security Legislation.....	322
3.1.1. Historical Significance of Employment in the Design of the Belgian Welfare State	323
3.1.2. Resulting Impact of this Genesis on Social Security Legislation.....	325

3.2. Employment as a Legitimation for the Rights-Based Character of Social Security Entitlements	329
4. Conclusion: a Duty to Rethink the Status Quo?	333

Chapter 13.

AI in Belgian Contract Law: Disruptive Challenge or Business as Usual?

Alexander APPELMANS, Maarten HERBOSCH and Benjamin

VERHEYE 335

1. Introduction	335
2. AI as a Communication Tool	337
2.1. Introduction	337
2.2. Conflict Between the Expressed Will and the Actual Will	338
2.3. Defect of Consent	339
2.4. Evaluation	342
3. AI Systems as Legal Persons	344
3.1. The Significance of Legal Capacity	344
3.2. Contractual Consequence 1: Attribution of Acts to the AI system	347
3.3. Contractual Consequence 2: AI System as a Representative	348
3.3.1. Mandate	348
3.3.2. Apparent Mandate	351
3.4. Evaluation	353
4. Building Bridges	354
4.1. Introduction	354
4.2. Roman Law Peculium	354
5. Conclusion	357

Chapter 14.

Tort Law and Damage Caused by AI Systems

Jan DE BRUYNE, Elias VAN GOOL and Thomas GILS 359

1. Introduction	359
2. Fault-Based Liability	361
2.1. General Considerations on the Burden of Proof for Fault-Based Liability	364
2.2. Violation of a Legal Rule Requiring Specific conduct	366
2.3. Violation of the General Duty of Care	370
3. Product Liability	376
3.1. The Notion of ‘Product’	377
3.2. The Notion of ‘Defect’	380
3.3. The Notion of ‘Producer’	384
3.4. The Defences for the Producer	385

4.	Liability for Defective Things.	388
4.1.	The Notion of ‘Defective Thing’.....	388
4.2.	The Custodian	393
5.	Other Common and Relevant Elements in Tort Liability Claims	395
5.1.	Damage in an AI-context	395
5.2.	Causation in an AI-context	397
6.	Legal Personality for AI systems	400
7.	Concluding Remarks.....	402

Chapter 15.

Insurance Underwriting on the Basis of Telematics: Segmentation and Profiling

	Jeffrey AMANKWAH	405
1.	Introduction	405
2.	Policy Underwriting in Vehicle Insurance	406
2.1.	The Basics of Insurance Underwriting.....	406
2.2.	Vehicle Insurance Underwriting	408
3.	Usage-Based Insurance: Paradigm Shift	410
3.1.	Different Types of Telematics/UBI Schemes	412
3.2.	Potential Benefits of Telematics/UBI Based Insurance	414
4.	Legal Challenges	416
4.1.	Refined Classification: Legal and Economic Considerations	416
4.1.1.	Principle of Mutualisation and Solidarity.....	416
4.1.2.	Refined Classification and Reducing Subsidising Solidarity: Identifying the Issues and Limits	418
A.	Legal Safeguards Regarding Segmentation in Belgium	418
B.	Pricing Competition	420
C.	Uninsurability	420
D.	Lack of Transparency and (Indirect) Discrimination ...	421
4.2.	Protection of Privacy and Personal Data: Legal Considerations.....	422
4.2.1.	General Principles of Data Protection	423
4.2.2.	Establishing an Individualised Risk Profile	424
4.2.3.	Legitimising UBI.....	425
5.	Conclusion	428

Chapter 16.

AI and Creditworthiness Assessments: the Tale of Credit Scoring and Consumer Protection. A Story with a Happy Ending?

	Julie GOETGHEBUER.....	429
1.	Introduction	429
2.	The Creditworthiness Assessment	431

2.1.	Creditworthiness Assessment and the Consumer Credit Directive	431
2.2.	Creditworthiness Assessment and Information	432
2.3.	Creditworthiness Assessment and Responsible Lending	436
3.	The Automation of Creditworthiness Assessment Through Credit Scoring	440
3.1.	Meaning and Function	440
3.2.	New Credit Scoring Techniques	444
4.	The Impact of Credit Scoring on Consumers	447
4.1.	The Potential Effects on Consumers-Borrowers	447
4.1.1.	Benefits	447
4.1.2.	Challenges	449
4.2.	The Confines of the Consumer Credit Directive	452
4.2.1.	Can the Use of Credit Scoring Techniques be Considered a Responsible Lending Practice?	452
4.2.2.	Are the Provisions of the Consumer Credit Directive Sufficient to Fully Protect Consumers?	453
5.	Conclusion	458

Chapter 17.

AI and the Consumer

	Skander BENNIS	461
1.	Introduction	461
2.	Benefits and Risks of AI as a Market Tool	462
3.	Building Blocks for a Consumer Policy in the Age of AI	465
4.	Consumer Autonomy versus Autonomous Machines	473
4.1.	AI-Based Marketing	473
4.1.1.	AI and Personalised Marketing (Targeting)	473
4.1.2.	AI and Personalised Pricing	479
4.2.	AI-Aided Contracting	481
4.3.	AI-Automated Enforcement	484
5.	Conclusion: A Tale about Open-Mindedness and Vigilance	485

Chapter 18.

Robots and AI in the Healthcare Sector: Potential Existing Legal Safeguards Against a(n) (Un)justified Fear for 'Dehumanisation' of the Physician-Patient Relationship

	Wannes BUELENS	487
1.	Introduction	487
2.	The Rise of Robotics and AI to Deal with Increasing Demands in the Healthcare Sector	487

3.	Only Qualified Persons are Allowed to Provide Healthcare.	493
4.	Liability Rules.	494
5.	The Right of the Patient to Receive Information about his/her Health Condition and to Give Informed Consent under the Belgian Law on Patient Rights	499
5.1.	Purpose and Nature of the Treatment	501
5.2.	Relevant Risks of the Use of AI	502
5.3.	Disclosure of the Alternative Treatments	503
5.3.1.	Disclosure of Alternatives to AI Systems and Robots	503
5.3.2.	Disclosure of AI as an Alternative	505
5.3.3.	Disclosure of AI Treatments in Other Hospitals	506
5.4.	Right of the Patient to Receive Information about his/her Health Condition.	507
5.5.	Information about the Use of AI/Robots and the Underlying Technology?	508
6.	Transparency and Informed Consent Under the GDPR.	511
6.1.	Transparency is Key under the GDPR	511
6.1.1.	General	511
6.1.2.	Decisions Solely Based on Automated Processing of Personal (Health) Data.	512
6.1.3.	Informed Consent under the GDPR.	516
7.	Conclusion	518
