

6th International Seminar on ORC Power Systems
October 11-13 2021
— Proceedings —

Conference series: International Seminar on ORC Power Systems

Conference name: 6th International Seminar on ORC Power Systems

Name of the proceedings: Proceedings of the 6th International Seminar on ORC Power Systems

Date of the conference: 11 – 13 October 2021

Location of the conference: virtual format

Organiser: Technical University of Munich

Publisher: Technical University of Munich

Year of publication: 2021

Editors: Christoph Wieland, Sotirios Karellas, Sylvain Quoilin, Christopher Schiffelechner, Fabian Dawo, Hartmut Spliethoff

ISBN of the digital proceedings: 978-3-00-070686-8

ISSN of the conference series: 2709-7609

The PDF of each paper can be accessed separately by clicking on the corresponding hyperlink embedded in the paper's title. A .zip file containing the PDFs of all papers is available [here](#).

Table of Content

ID	Paper Title	Author
1	Dimensional analysis and performance laws for organic vapor flow turbomachinery	<i>Stefan aus der Wiesche; Felix Reinker</i>
4	A user-friendly Pitot probe data reduction Excel-Refprop-Routine for non-ideal gas flow applications	<i>Jan-Niklas Schollmeier; Stefan aus der Wiesche</i>
5	Performance and economic evaluation of a reversible high-temperature heat pump/ORC for waste heat recovery in the marine sector	<i>George Kosmadakis; Panagiotis Neofytou</i>
6	Workflow design methodology for ORC system dedicated to waste heat recovery from the engine coolant of commercial vehicles	<i>Pascal Smague; Mickael Loszka; Jules Sery</i>
9	Comparative thermal and flow analyses of two different plate patterns for a compact plate heat exchanger	<i>Barış Gürel; Ali Keçebaş; Volkan Ramazan Akkaya; Merve Göltaş; Karani Kurtuluş; Onur Vahip Güler</i>
10	Experimental study of an ultra-high-speed ORC turbogenerator	<i>Tomasz Zygmunt Kaczmarczyk; Grzegorz Żywica; Paweł Bagiński; Artur Andrearczyk</i>
12	Design and optimization of a Tesla pump for ORC applications	<i>Eduardo Anselmi Palma; Daniele Fiaschi; Giampaolo Manfrida; Giovanni Nicotra; Lorenzo Talluri</i>
13	Simulation of a supersonic stator vane under two-phase inlet conditions	<i>Martin White; Teemu Turunen-Saaresti</i>
17	Thermodynamic analysis of the off-design performance of a micro solar organic Rankine cycle trigeneration system	<i>Ramin Moradi; Pietro Elia Campana; Roberto Tascioni; Luca Cioccolanti</i>
18	Experimental investigation of a kW scale absorption power cycle with LiBr solution	<i>Vaclav Novotny; Jan Spale; Jan Pavlicko; Michal Kolovratnik</i>
19	Scaling-up a biomass fired micro-CHP ORC for better performance towards commercialization	<i>Jakub Mascuch; Jan Spale; Vaclav Vodicka; Zbynek Zeleny; Vaclav Novotny</i>
20	Combined thermodynamic and turbine design analysis of transcritical CO₂ cycle for waste heat recovery	<i>Antti Uusitalo; Teemu Turunen-Saaresti</i>
21	Composition Optimization of Zeotropic Mixtures for ORC Systems Considering Constraints	<i>Benedikt Gregor Bederna; Riley B. Barta; Ullrich Hesse</i>
22	Life Cycle Assessment (LCA) of an air-cooled ORC system for waste heat recovery	<i>Maximilian Oehler; Benedikt Gregor Bederna; Riley B. Barta; Ullrich Hesse</i>
23	Preliminary operation assessment of a two-stage ORC engine combined with evacuated tube solar collectors throughout Greece	<i>Konstantinos Soulis; Dimitris Manolakos; Erika Ntavou; George Kosmadakis</i>
24	Improving the off-design efficiency of ORC bottoming cycle by variable area nozzle turbine technology	<i>Mohammad Ali Motamed; Lars O. Nord</i>
25	Thermodynamic evaluation of an ORC test RIG - from comprehensive experimental results to a simulation model	<i>Tobias Popp; Florian Heberle; Andreas P. Weiß; Dieter Brüggemann</i>

26	Thermodynamic analysis of a combined Organic Rankine Cycle (ORC) with Proton Exchange Membrane Electrolyzer (PEME) in an integrated biomass conversion system	<i>Oreva Joe Ogorure; Florian Heberle Dieter Brüggemann</i>
27	Modelling and design of a two-phase reciprocating expander for integration in a trilateral flash cycle	<i>Xander van Heule; Anastasios Skiadopoulos; Dimitrios Manolakis; Michel De Paepe; Steven Lecompte</i>
28	Structural analysis of a regenerative flow turbine for low temperature organic Rankine cycle systems	<i>Luca Cioccolanti; Edoardo Mancini; Ramin Moradi; Emanuele Farotti; Marco Sasso</i>
29	Thermodynamic low-order model for the simulation of two-phase expansion within a TFC unit	<i>Anastasios Skiadopoulos; Xander van Heule; George Kosmadakis; Dimitrios Manolakis; Michel de Paepe; Steven Lecompte</i>
33	Improved ORC cycle for power production by using low temperature heat	<i>Jürgen Krail; Georg Beckmann; Florian Schittl</i>
34	Investigation of the effects of plate patterns on effectiveness and entropy generation in plate heat exchangers	<i>Bariş Gürel; Ali Keçebaş; Volkan Ramazan Akkaya; Ramazan Algan; Merve Göltas; Onur Vahip Güler</i>
40	Steam Rankine cycle instead of organic Rankine cycle for distributed high temperature waste heat recovery – pros and cons	<i>Florian Raab; Harald Klein; Frank Opferkuch</i>
41	Numerical investigation of flow field and structure of a micro-axial turbine of ORC using R245fa	<i>Yi-Chen Li; Hung-Chun Hsu; Jui-Ching Hsieh</i>
44	Launch and first experimental results of a reversible heat pump-ORC pilot plant as Carnot Battery	<i>Daniel Steger; Jürgen Karl; Eberhard Schlücker</i>
45	Design and experimental analysis of high-speed feed pump for small-scale ORC	<i>Petri Sallinen; Antti Uusitalo; Juha Honkatukia; Jonna Tiainen; Teemu Turunen-Saaresti</i>
46	Performance comparison of organic Rankine cycle (ORC) and CO₂ cycle for simultaneous utilization of liquefied natural gas (LNG) cold energy and solar energy	<i>Haoshui Yu; Ning Guo; Sylvain Quoilin; Gürkan Sin</i>
48	Comprehensive heat exchanger performance evaluation method on ocean thermal energy conversion for maximum net power	<i>Takeshi Yasunaga; Akira Miyazaki; Kevin Fontaine; Yasuyuki Ikegami</i>
49	Model predictive control for organic Rankine cycle systems on heavy-duty trucks: controller tuning and optimization	<i>Roberto Pili; Christoph Wieland; Hartmut Spliethoff; Fredrik Haglind</i>
51	Techno-economic analysis of partial evaporation organic Rankine cycle systems for geothermal applications	<i>Carlotta Tammone; Roberto Pili; Sigurd Indrehus; Fredrik Haglind</i>
53	High temperature direct vapor generation organic Rankine cycle in the concentrated solar power application	<i>Pengcheng Li; Jing Li</i>
55	Design of a reversible heat pump/organic Rankine cycle unit for a renewables-based trigeneration system	<i>Antonios Charalampidis; Konstantinos Braimakis; Sotirios Karelis</i>
56	Design of experiments for supersonic ORC nozzles in linear cascade configuration	<i>Marco Manfredi; Giacomo Persico; Andrea Spinelli; Paolo Gaetani; Vincenzo Dossena</i>

57	<u>Wet to dry cycles for high temperature waste heat valorisation using a diphenyl-biphenyl oxide mixture</u>	<i>Egoi Ortego Sampedro; Léopold Védie</i>
58	<u>Optimization of a Rankine Cycle integrated in a Long-Range Intercity Bus with expander sizing</u>	<i>Patrick Hadamitzky; Maximilian Hebel; Juergen Koehler; Roland Scharf</i>
59	<u>Investigation of a topping/bottoming ORC based CHP configuration using a new evaporator concept for residential applications</u>	<i>João Silva Pereira; Ricardo Mendes; Jorge Campos André; José Baranda Ribeiro</i>
62	<u>Zeotropic mixtures study in plate heat exchangers and ORC systems</u>	<i>Quentin Blondel; Nicolas Tauveron; Guillaume Lhermet; Nadia Caney;</i>
63	<u>Comparison of four types of radial turbines for a 250KW ORC power installation</u>	<i>Maksim Smirnov; Natalia Kuklina; Aleksandr Sebelev; Alessandro Zuccato; Nikolay Zabelin</i>
64	<u>The impact of working fluid charge on performance of organic Rankine cycle using zeotropic mixture under design condition</u>	<i>Liuchen Liu; Guomin Cui; Christoph Wieland; Hartmut Spliethoff</i>
65	<u>Introduction of a High-Level: Application Based Sizing Methodology for Carnot Batteries</u>	<i>Robin Tassenoy; Kenny Couvreur; Wim Beyne; Michel De Paepe; Steven Lecompte</i>
67	<u>Supercritical heat transfer to refrigerants: advances on a new experimental test rig</u>	<i>Jera Van Nieuwenhuysse; Steven Lecompte; Michel De Paepe</i>
68	<u>On Mixtures as Working Fluids for Air-cooled ORC Bottoming Power Plants of Gas Turbines</u>	<i>Dabo Krempus; Sebastian Bahamonde; Teus van der Stelt; Carlo Maria De Servi; Wolfgang Klink; Piero Colonna</i>
69	<u>Steady and transient operations of small-scale ORC-based power unit for low-grade thermal sources</u>	<i>Fabio Fatigati; Davide Di Battista; Marco Di Bartolomeo; Giammarco Di Giovine; Luigi Mariani; Roberto Cipollone</i>
70	<u>Environmental analysis of a small scale marine ORC</u>	<i>Tryfon Roumpedakis; George Kallis; Zoi Koutantzi; Platon Pallis; Antonios Charalampidis; Sotirios Karellas</i>
71	<u>Advanced Organic Rankine Cycles for thermally integrated Carnot batteries</u>	<i>Maximilian Weitzer; Dominik Müller; Jürgen Karl</i>
72	<u>Fault Ride Trough requirements by grid codes: transient analysis and solutions for 1-10 MW range ORCs</u>	<i>Francesco Moraschinelli; Roberto Bini; L. Frosio; D. Migliari</i>
73	<u>Experimental investigation of the partially evaporated organic Rankine cycle for various heat source conditions</u>	<i>Fabian Dawo; Jonathan Buhr; Christoph Wieland; Hartmut Spliethoff</i>
76	<u>Evaluation of Plant Configurations for Geothermal Trigeration Systems with Organic Rankine Cycles</u>	<i>Christopher Schifflachner; Florian Kaufmann; Ludwig Irrgang; Lara Kuhnert; Fabian Dawo; Christoph Wieland; Hartmut Spliethoff</i>
77	<u>Integration of geothermal energy; waste; and cold energy system employing the technology of organic Rankine cycle</u>	<i>Sindu Daniarta; Piotr Kolasiński</i>
78	<u>A preliminary study of two-phase volumetric expanders and their application in ORC systems</u>	<i>Sindu Daniarta; Piotr Kolasiński</i>

79	Analysis of heat transfer within rotary vane expander	<i>Przemysław Błasiak; Piotr Kolasiński; Sindu Daniarta</i>
80	Features and characteristics of low grade heat storage for organic Rankine cycle	<i>Sindu Daniarta; Piotr Kolasiński</i>
81	Shock losses and pitot tube measurements in non-ideal supersonic and subsonic flows of organic vapors	<i>Camilla Conti; Alberto Fusetti; Andrea Spinelli; Alberto Guardone</i>
83	Experimental and numerical assessment of an asymptotically correct choking mach number correlation for organic vapor flows through turbine cascades	<i>Stefan aus der Wiesche; Leander Hake; Paola Cinnella</i>
84	Subsonic organic vapor flow past a circular cylinder	<i>Paola Cinnella; Camille Matar; Xavier Gloerfelt; Felix Reinker; Stefan Aus der Wiesche</i>
85	From 1885 to nowadays: a (short) techno-historical review of solar organic Rankine cycle systems	<i>Rémi Dickes; Adriano Desideri; Emiliano Casati; Sylvain Quoilin</i>
86	Evaluation of reversible screw compressors with an adaptable built-in volume ratio in reversible heat pumps	<i>Florian Kaufmann; Christopher Schiffler; Fabian Dawo; Christoph Wieland; Hartmut Spliethoff</i>
87	Exergetic Performance Evaluation of Ocean Thermal Energy Conversion System with Crossflow Plate Heat Exchangers	<i>Takeshi Yasunaga; Taisei Nakamura; Tomoya Okuno; Yasuyuki Ikegami</i>
90	The potential of supercritical cycles based on CO₂ mixtures in concentrated solar power plants: An exergy-based analysis	<i>Francesco Crespi; Pablo Rodríguez de Arriba; David Sánchez; Antonio Muñoz; Tomás Sánchez</i>
91	Off-design characterisation of a hybrid energy storage based on pumped thermal energy storage and low-concentration solar thermal collectors	<i>Guido Francesco Frate; Andrea Baccioli; Leonardo Bernardini; Lorenzo Ferrari</i>
92	The effect of working fluid and compressibility on the optimal solidity in ORC turbine cascades	<i>Francesco Tosto; David Pasquale; Piero Colonna; Matteo Pini</i>
93	Multi-fidelity robust design optimization of an ORC turbine for high temperature waste-heat recovery	<i>Aldo Serafino; Benoit Obert; Paola Cinnella</i>
95	ORC system optimisation: Innovative exhaust heat exchanger: in-engine block heat exchanger and zero impact condenser	<i>Cor Rops; Tahmid Hossain; Patrique Boerboom</i>
100	Experimental transient analysis of micro-ORC system for low-grade heat recovery	<i>Michele Bianchi; Lisa Branchini; Andrea De Pascale; Francesco Melino; Saverio Ottaviano; Antonio Peretto; Noemi Torricelli</i>
102	Compact and high efficient Rankine-evaporator following economical targets	<i>Peter Ambros; Daniel Raab; Markus Keite; Florian Raab; Frank Opferkuch</i>
103	Evaluation of organic Rankine cycle using low GWP fluids as a technology for Algerian cement industries waste heat recovery	<i>Youcef Redjeb; Alberto Benato; Anna Stoppato; Khatima Kaabeche-Djerafi</i>
105	ORC Geothermal power plants: an analysis of the structure and trends of the European market	<i>Thomas Garabetian</i>

106	Flexibility services and capacity availability: towards a business model and regulatory framework for geothermal ORC plant market uptake	<i>Thomas Garabetian</i>
110	Assessment of an Inverse Organic Rankine cycle system for the ECS of a large rotorcraft adopting a high-speed centrifugal compressor and a low GWP refrigerant	<i>Federica Ascione; Carlo Maria De Servi; Onno Meijer; Vincent Pommé; Piero Colonna</i>
111	Earthquake early warning system for geothermal binary power plant in Indonesia	<i>Stefan Kranz; Ali Saadat; Gina Kupfermann; Bernd Weber; Suyanto Suyanto</i>
112	The effects of the tip clearance on the performance of small-scale turbopumps for ORC applications; analysis and modeling	<i>Sajjad Zakeralhoseini; Jürg Schiffmann</i>
113	Simultaneous optimization of cycle and expander design for truck on board waste heat recovery with ORC technology	<i>Marco Manfredi; Andrea Spinelli; Marco Astolfi</i>
115	Optimal design and localization of a biomass-fired ORC in DH systems: an energetic, environmental and economic analysis	<i>Chiara Monzani; Giulio Cerino Abidin; Alberto Poggio</i>
124	Thermodynamic and thermoeconomic evaluation and optimization of an ORC coupled to a combined reverse osmosis/ membrane distillation desalination system	<i>Ammar Mouaky; Adil Rachek</i>
126	Experimental investigation of response time characteristics of an organic Rankine cycle evaporator for waste heat recovery	<i>Manuel Jimenez-Arreola; Christoph Wieland; Alessandro Romagnoli</i>
128	Development of an Advanced Monitoring Application for Geothermal Power Plants with an Organic Rankine Cycle	<i>Matthäus Irl; Christoph Wieland; Hartmut Spliethoff</i>
129	Dynamics of SCO₂ heat to power units equipped with dual tank inventory control system	<i>Matteo Marchionni; Giuseppe Bianchi; Savvas A Tassou</i>
130	Dynamic exergy analysis of a recuperative dual-pressure ORC driven by waste heat	<i>Nan Jiang; Yang Du; Kang Chen; Gang Fan; Jiangfeng Wang; Pan Zhao; Yiping Dai</i>
131	Dynamic control strategies for a solar-ORC system using first-law dynamic and data-driven machine learning models	<i>Zheng Liu; Alessandro Romagnoli; Paul Sapin; Christos Markides; Matthias Mersch</i>
132	Thermodynamic analysis on trilateral flash cycle (TFC) for low grade heat to power generation using different working fluids	<i>Christina Antonopoulou; Konstantinos Atsonios; Panagiotis Grammelis; Dimitris Manolakos; Anastasios Skiadopoulos; Pantelis Bakalis</i>
134	Preliminary study on a novel transcritical CO₂ high-temperature heat pump	<i>Ji Wang; Martin Belusko; Ming Liu; Michael Evans; Alemu Alemu; Frank Bruno</i>
136	Analysis of siloxane mixtures used in organic Rankine cycle with thermal stability limits	<i>Wenhuan Wang; Xiaoye Dai; Lin Shi</i>
137	Configuration optimization of a splitting CO₂ transcritical power cycle in engine waste heat recovery: An experimental comparative study	<i>Ligeng Li; Hua Tian; Lingfeng Shi; Yonghao Zhang; Xuan Wang; Gequn Shu</i>
139	A reduced order model to predict the machining time and cost of small-scale radial-inflow turbines	<i>Matthias Geiselhart; Torben Anker Lenau; Jürg Schiffmann; Fredrik Haglund</i>

141	<u>Accelerating iterative equation of state calculations with superancillary phase boundaries</u>	<i>Ian Bell</i>
143	<u>Screw expander characteristics for ORC system design</u>	<i>Henrik Öhman</i>
144	<u>Heat transfer characteristic of plate evaporator using aluminum herringbone plate for OTEC</u>	<i>Hirofumi Arima; Yuta Shigenaga; Masanao Nishiguchi</i>
145	<u>Sea trials of an organic triangle system (OTC) for waste heat recovery</u>	<i>Lance Hays; Atsushi Otsuka; Patrick Boyle</i>
146	<u>A novel LNG cold energy compressive utilization system</u>	<i>Kang Chen; Yang Du; Yiping Dai; Tianliang Yang; Xiaowei Zheng; Wenbin Li</i>
